INTRODUCTION

“When you use this comprehensive plan you are sharing in the creation of a place. The place we know as the City of Sarasota has been created by nature and by the men and women who have been here before us. The place we know as the City of Sarasota will become a different place in the course of our lifetimes. In some small way, it will even be different tomorrow. And it is we who will help to make that difference. We will shape this place by the way we preserve - or spoil - our resources, by our choice of where and how to build, and by the small decisions we make as we live here.

This plan is a statement of what this community hopes to be, and how it proposes to get there....”

From the *Sarasota City Plan* in 1986.
It is with this sentiment in mind that we proceed.

HISTORY

The City of Sarasota has a long history of planning. The City's first comprehensive plan was developed in 1925. Updates were produced in 1960, 1972, 1979, 1986, 1989, and 1998.

Beginning in 1979, plans were prepared under the guidelines of the State's Local Government Comprehensive Planning and Land Development Regulation Act of 1975 which was amended in 1985. This Act imposes extensive requirements on local governments for the preparation of comprehensive plans. The Act also recognizes that planning is a continuous and ongoing process and local governments need to periodically assess the appropriateness of their comprehensive plans.

In 2004 and 2005 the City prepared an Evaluation and Appraisal Report (EAR) to determine its progress in implementing the 1998 comprehensive plan known as the Sarasota City Plan. The EAR was adopted on October 11, 2005 and its recommendations are incorporated into this edition of the Sarasota City Plan.
